GELSER BROTHERS

Dalton, New York

PRICES AND TERMS

Gladiolus prices are good for this spring only and good only as long as our present stocks last.

TERMS: Full remittance should accompany all orders. However, we will ship C. O. D. on request, when 25 per cent of the amount of the order is paid in advance.

SIZE OF GLADIOLUS BULBS

Large bulbs are $1\frac{1}{4}$ to 2 inches or more in diameter (No. 1 & No. 2) the best blooming size. Large bulbs are designated by the letter "L".

Medium bulbs are $\frac{3}{4}$ to $1\frac{1}{4}$ inches in diameter (No. 3 & No. 4). This size will give good bloom, but a little later than the large size. Medium bulbs are designated by the letter "M".

Small bulbs are $\frac{3}{8}$ to $\frac{3}{4}$ inches in diameter. This size is designated by the letter "S".

When there is a figure before the price of a variety as 2-15c or 3-15c, it means 2 bulbs for 15c, or 3 bulbs for 15c, etc.

DELIVERY CHARGES

We pay the delivery charges on bulbs selected from our retail list. Bulbs priced by the 100 are not prepaid.

ORDER EARLY

Please place your order early in order to avoid disappointment, as many varieties will be sold out early.

There is a shortage of bulbs this season, due to decreased planting by nearly all growers and with the increased demand for bulbs, it looks now as though there will not be sufficient bulbs for all.

SECOND CHOICE PLEASE

Due to the heavy demand for bulbs this year, it is to your advantage and also ours, if you would give a second choice, either in size or another variety.

GELSER BROTHERS

Dalton, New York

10 bulbs of a variety at 8 times the single price.

Abe (Ellis) Tall apricot salmon blended with orange. L 2-15c, M 3-15c.

Admiral (Pf.) Brilliant scarlet red, dark crimson blotch. L 10c, M 2-15c. Pint blts. \$4.00.

Allegro (Pf.) Fine lavender blue with dark blue blotch. L 10c, M 2-15c.

Alice Reid (Gelser) La France pink overlaid with geranium pink. L 2-15, M 3-15c.

Zuni (Mitsch) Salmon and slate. A rich colored smoky. L 2-15c, M 3-15c.

De Luxe Mixture For those who do not wish to keep the varieties separate, but desire a nice collection of Glads.

Large, 100 for \$4.00, Medium 100 for \$3.00.

GLADIOLUS THRIP

The Thrip is a very small insect about 1/20th of an inch in length and not easily seen, except when numerous. Thrips do not overwinter outdoors, where the ground freezes. The main source of infection is from planting bulbs infected with the insects. If your gladiolus did not blossom as well as in former years, it may have been due to the Thrip and you should treat your bulbs before planting.

For treating a small number of bulbs, the simplest and most convenient method is by the use of NAPHTHALENE FLAKES. This material, inter-mixed with the bulbs at the rate of 1 oz. to 100 large bulbs in a paper bag or box, gives complete control. After 2 or 3 weeks all insects should be dead. Do not delay this treatment too long, as the small root-nobs that form toward spring may be injured by the naphthalene. Also remove the naphthalene from the bulbs after treating.

Bichloride of Mercury will give good results in the control of Thrips. Use one ounce to seven gallons of water and leave in the solution over night, twelve hours or more at a temperature of 70 degrees or warmer. You must use a non-metal container, as a crock, glass or wooden pail. Varieties can be kept separate in cloth bags. This solution is a deadly poison and must be used and disposed of with extreme care.

Napthalene and Bichloride of Mercury may not be available for the duration. In that case you can use LYSOL, which you can purchase at any drug store. Use 4 teaspoonfuls of Lysol to one gallon of water and leave bulbs in this solution for 6 or 7 hours.

The Bichloride of Mercury and Lysol treatments should be used just before planting.

Tartar Emetic Spray for Gladiolus Thrips.

Tartar Emetic can be purchased from almost any drug store. Use one ounce of Tartar Emetic and four ounces of brown sugar to three gallons of water. Spraying should be started as soon as the plants are 6 inches high and continued until buds show color.

The plants should be sprayed every 10 days and after every hard rain when the foliage is dry. A very fine mist is most effective.

WHOLESALE LIST

Not Prepaid

Prices per 100, 25 bulbs at the same rate.

No discount on larger quantities.

1/2 pint bulblets at the pint rate.
